

viewers

presenter

Pochi is great, easy to use and very useful

as the presenter flips through the presentation pages, the viewer devices instantly and securely receive the updated pages.

can be used for meetings, conferences and school classes.

no monthly fees, no login, no credit card, no ads, no tracking ...

Pochi is really two Apps talking to each other.

Pochi Presenter:

- use by the presenter to interact and share a presentation

Pochi Viewer:

- use by the audience to view a presentation

Wi-Fi:

- all devices must be connected to the same Wi-Fi network

Pochi Presenter

- selects a PDF document from the iPhone/iPad *Files folder, iCloud, Dropbox ...* and press **Start**.
- pressing **Start** with no selection will show a set of whiteboards for drawing on.
- Pochi Presenter includes the Pochi Viewer.

Pochi Viewer

- is **FREE** and is used to view the presentations
- it has the Pochi Presenter functions disabled after 7 days

Pochi Presenter

- has a built-in drawing tool to annotate the presentation.
- it also includes a set of whiteboards for free drawing.
- can print, save and share the presentation.

Pochi Viewer

- can also print, save and share the presentation.
- is secure and fast

- Pochi home page is at:
 - <https://workingdog.github.io/pochi/>
- Pochi support is at:
 - pochi.assist@gmail.com
- Pochi **does not**:
 - record any personal info, ask for login, lock you into subscription, track you, push ads, and no in-app purchase
